

CEDRICK ALBUERO

Software Developer Intern | Full-Stack Developer
San Pablo City, Laguna, Philippines | albueroCEDRICK11@gmail.com | +639156485494

PROFESSIONAL SUMMARY

BSIT student majoring in Software Development with hands-on experience building full-stack web applications and AI-powered mobile applications. Skilled in JavaScript, React, Node.js, Express.js, and PostgreSQL, with experience in REST API development, authentication, database integration, and offline-first application architecture. Seeking a Software Developer Internship to contribute to real-world software projects while strengthening software engineering skills.

PROJECTS

Electronic Business Permits and Licensing System (eBPLS)

Full-Stack Developer

San Pablo City, Laguna
May 2026 – September 2026

- Designed and developed a role-based business permit system supporting application processing, document verification, fee assessment, and permit generation workflows.
- Implemented REST APIs, JWT authentication, and RBAC middleware using Node.js and Express.js to support secure, role-specific access.
- Integrated PostgreSQL and Supabase with React.js and Zustand to support application data management and frontend state handling.
- Implemented PayMongo payment integration with webhook-based payment confirmation alongside over-the-counter payment workflows.

HanapMedisina

Full-Stack & AI Mobile Application Developer

San Pablo City, Laguna
April 2026 – Present

- Developed an offline-first React Native application that identifies Philippine medicinal plants using an on-device TensorFlow Lite model.
- Implemented local JSON data management, AsyncStorage persistence, and Zustand state management to support offline access to plant information.
- Integrated camera-based plant scanning and on-device AI inference using React Native Vision Camera and react-native-fast-tflite.
- Structured the application using Expo Router, modular service layers, and reusable UI components to support maintainable mobile development.

EDUCATION

DALUBHASAAN NG LUNSOD NG SAN PABLO

Bachelor of Science in Information Technology
Major in Software Development

San Pablo City, Laguna, Philippines
2022 – Present | Expected Graduation: June 2026

ACHIEVEMENTS AND AWARDS

2nd place, Byte the Facts IT Quiz Bee — 2025
Champion, National ICT Month 2024 Code Wars Competition — 2024

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PostgreSQL

Frontend Development: React.js, React Native, HTML, CSS, Zustand

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC)

Databases & Storage: PostgreSQL, Supabase, Firebase

Tools & Technologies: Git, GitHub, Postman, Expo, TensorFlow Lite, Google Antigravity
